

NXG G7 Time Clock

Introducing the premier, next-generation time clock.

Keeping in step with your evolving employee time and attendance needs, the new NXG G7 delivers advanced time tracking you can count on. It boasts a convenient, large 7-inch touchscreen with kiosk features going beyond view-only activities like viewing time off balances. Employees can now also submit time off requests, which enhances their experience and engagement.

Realize time and cost savings with more authentic and accurate time tracking data.

The NXG G7 is extremely configurable to serve your specific needs. It's equipped to support traditional swipe cards, proximity readers, key code entry, UV-clean lights and biometric access with a finger scan to help you cover all your bases. And for future-proofing your business, it comes with an embedded camera for activating upcoming product enhancements such as photo tracking (coming soon), better equipping you to eliminate time theft whether deliberate, accidental or negligent.

Benefits

- Employees can submit time off request directly from the clock
- Employee schedule limits and restrictions prevent punches outside of their scheduled times
- Optional minimum meal break restrictions help ensure compliance to state laws and/or company policy
- Employees can change department and job assignments
- Easy entry of tips and other disbursements
- Convenient employee schedule views for the current day and up to four future schedule blocks
- Employees can view current day punches
- Supervisors can override schedule and meal restrictions
- Missing punches can be entered by a supervisor
